James BADIBANGA

Full-Stack Developer & AI Integration

Full-stack developer (React, Next.js, Node.js, databases) who designs and ships web platforms end to end: e-commerce, crowdfunding, ERP and corporate websites. I can also integrate AI tools into business processes. Since 2024 at AL & Legacy, I design tools and websites and support institutional consulting engagements with government ministries in the DRC. Alongside this, I deliver web platforms for clients through my own practice, Criho Tech.

CLIENT PROJECTS DELIVERED

Sotradons — CSR crowdfunding platform connecting companies with social initiatives — over \$500K in transaction volume processed.

Vite, Tailwind CSS

Mabele Coop — E-commerce platform for organic and local produce with delivery in Kinshasa — 1,500+ customers and 50+ partner producers.

Next.js, React, Tailwind CSS

AL & Legacy — Corporate website for the consulting firm.

Next.js, React, Tailwind CSS, Vercel

ERP — Fondation Entreprendre RDC — Internal ERP built end to end, from database design to production — about 60% reduction in processing time.

Other work — Poulex, Diasporium, Ajabu Service, Brievents, Roc Dépannage, Alumni LA University; contributions to FOGEC and Kadea Academy.

PROFESSIONAL EXPERIENCE

Full-Stack Developer & Project Officer

May 2024 – present

AL & Legacy Intelligence Provider · Kinshasa

- Designed and deployed the firm's corporate website (Next.js, React, Tailwind CSS, Vercel).
- Built internal document automation tools (transcription, Word document generation) using AI models.
- Ministry of Mines engagement: assessed the digital capabilities of 9 mining-sector agencies and designed a digital one-stop shop. Contributed to the main report (50 pp.), the master plan and the pitch deck presented to the Minister.
- Produced specifications for public digital transformation projects (Congo Numérique 2035 national strategy, E-agri / ONAPAC modernisation).

Web Developer – Founder

Concurrent

Criho Tech · Kinshasa

- Design, development and launch of client web platforms (see projects below); single point of contact from data modelling to deployment.

Web Developer (Kadea Academy project)

Oct. 2023 – Jan. 2024

Vodacom Foundation · Kinshasa

- Built a 6-page showcase website and a fundraising feature to finance the foundation's activities.

Web Developer – Academic internship

Mar. – Sept. 2022

Baruvi Business · Goma

- Independently developed a website and designed its SQL database.
